-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-18 are presented for examination.

**Claim Rejections - 35 USC § 102**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeda et al. (5,937,391 hereinafter Ikeda).

With respect to claims 1,3, 4, 6-8, 11, 13-15, 18 Ikeda teaches a loyalty system for awarding incentives to a customer based on a multi-merchant loyalty system (Abstract). A master loyalty program associated with the multi-merchant loyalty system (i.e. see points issuing unit 1 and col. 3, lines 52-58); at least one merchant specific loyalty program associated with the multi-merchant loyalty system (col. 4, lines 15-60); a ,means for providing a merchant access to the multi-merchant loyalty system by a merchant module and registering the merchant (col. 4, lines 55-60 and col. 12, lines 52-60); a means for providing a customer choice of an incentive via a module(i.e. the customer chooses how and where to redeem his incentive or points)(see figure 16).

With respect to claims 2, 5, 9, 12, Ikeda further teaches enabling a customer to track incentives via a module(Figure 6).

With respect to claim 10, Ikeda further teaches means for generating a certificate when a predetermined parameter is fulfilled (i.e. the customer receives a notification by mail when points are close to expiration)(col. 8, lines 24-47).

**Claim Rejections - 35 USC § 103**

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-17 rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda in view of Barnett et al.(6,336,099 hereinafter Barnett) .

Claims 16-17 further recite tracking the customer data to create a customer profile and an incentive promotion. Ikeda teaches tracking the customer purchase data (see figure 8). Ikeda doesn't specifically teach using the data to create a customer profile and an incentive promotion for that customer. Barnett teaches on Figure 9, using the user data in order to determine subsequent coupon sets. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included the teachings of Barnett of using the user data because such a modification would allow the system to determine subsequent coupon sets.
